EDUCATION

Lokmanya Tilak College of Engineering <i>Bachelor of Engineering, Electronics and Telecommunication</i>	Koparkhairane, Navi Mumbai <i>Dec 2021 – May 2025</i>
Laxman Devram Sonawane College <i>HSC Science (Score 87%)</i>	Kalyan, Mumbai <i>Jul 2019 – Jun 2021</i>
Sainath English High School <i>SSC (Score 73.80%)</i>	Vashi, Navi Mumbai <i>Jun 2018 – Jul 2019</i>

TECHNICAL SKILLS

Languages: Python, Bash, SQL (MySQL), HTML/CSS, R
Developer Tools: Git, Github, Microsoft Azure, AWS, VS Code, Visual Studio, PyCharm
Libraries: Pandas, NumPy, Matplotlib, Flask
Boards: Arduino, ESP32, ESP8266, HC-05, MSP430
Systems: Linux, Windows 10, Windows 11, Ubuntu

INTERNSHIPS

Data Analyst Intern <i>Optimized Tech Solutions</i>	Aug 2024 – Feb 2025
- Managed and analyzed banking service records to improve workflow efficiency. - Developed reports and dashboards using SQL, Excel, and data visualization tools. - Worked in a hybrid mode, ensuring seamless data processing and collaboration.	
Developer and Technology Virtual Experience Programme Accenture UK, Forage	Jul 2024
- Developed end-to-end understanding of the Software Development Lifecycle - Conducted research on emerging technology trends, focusing on DevOps - Created and presented analysis comparing Waterfall and Agile methodologies - Designed a custom algorithm using pseudocode and flow diagrams - Debugged Python program by fixing syntax and logic errors	
Accenture North America Data Analytics and Visualization Job Simulation on Forage	Apr 2024
- Completed a simulation focused on advising a hypothetical social media client as a Data Analyst at Accenture - Cleaned, modelled and analyzed 7 datasets to uncover insights into content trends to inform strategic decisions - Prepared a PowerPoint deck and video presentation to communicate key insights for the client and internal stakeholders	
Goldman Sachs Software Engineering Virtual Experience Program on Forage	Apr 2024
- Completed a job simulation as a governance analyst, assessing IT security and suggesting improvements - Identified outdated password hashing algorithm by cracking passwords using Hashcat - Proposed uplifts for increased password protection, including extending minimum password length and using a dedicated hashing algorithm	
Cognizant Artificial Intelligence Job Simulation on Forage	Mar 2024
- Completed a job simulation focused on AI for Cognizant's Data Science team - Conducted exploratory data analysis using Python and Google Colab for one of Cognizant's technology-led clients, Gala Groceries - Prepared Python module for model training and performance metrics for Machine Learning engineering team - Communicated findings and analysis through PowerPoint presentation to present the results back to the business	
Mastercard Cybersecurity virtual experience program on Forage	Mar 2024
- Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team - Helped identify and report security threats such as phishing - Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams	

PROJECTS

- Instant Video Language Translation** | *Python (Flask), Google APIs* Jun 2024 – Present
- Built a video language translation system to process, transcribe, and translate video content across languages.
 - Utilized Speech-to-Text, Google Translate API, and gTTS to generate subtitles and voiceovers.
 - Enhanced accessibility with real-time, multi-language video outputs for diverse audiences.
- Real-Time Translation System** | *Python (Flask), JavaScript, WebRTC, Google APIs* May 2024 – Present
- Developed a real-time speech-to-text and translation system supporting multiple languages.
 - Integrated WebSockets for seamless, low-latency translation and live updates.
 - Implemented front-end and back-end using HTML5, JavaScript, and Python (Flask), leveraging Web Speech API for text-to-speech.
- Anon-SMS** | *Python, Bash* | [Github](#) Sep 2019 – Present
- Developed a command-line tool to send free anonymous SMS with support for Linux and Termux.
 - Integrated auto-update, message tracking, and international messaging features.
 - Enhanced user experience with a colorful interface and seamless execution.
- Smart Home Automation** | *ESP32, HC-05, Arduino, Blynk IoT, OpenCV, AdaFruit* Mar 2023 – Apr 2024
- Developed an integrated IoT system for home automation, security, and smart switch control with seamless device expansion without code modifications.
 - Implemented an online-offline control mechanism with a web dashboard for remote monitoring and management.
 - Enhanced security with face detection and child safety features using OpenCV and ESP32-Cam.
 - Replaced conventional switch boards with an IoT-based smart switch system for remote operation.

CERTIFICATIONS

- Ambassador Challenge Vision AI900** | *Microsoft Learning* June 2024
- Learned fundamental AI concepts and machine learning basics
 - Gained proficiency in Azure AI services, including Computer Vision and Facial Recognition
 - Mastered fundamentals of Text Analysis, Optical Character Recognition, and conversational language understanding
- Ambassador Challenge A ride in the world of Azure** | *Microsoft Learning* May 2024
- Learned fundamentals and advanced features of Azure AI services
 - Explored core architectural components and storage services in Azure
 - Gained skills in implementing Retrieval Augmented Generation(RAG) and prompt engineering with Azure OpenAI Service
- Project Management Foundations : Teams** | *LinkedIn Learning* Dec 2023
- Covered essential project management principles with a focus on effective teamwork
 - Developed skills in time management, collaboration, and project planning within multidisciplinary teams
 - Applied learning to real-world scenarios, enhancing proficiency in coordinating and executing projects successfully
- Microsoft Azure AZ900** | *Koenig Solutions* Feb 2024
- Learned Time Management while Working with team
 - Hands on training with Microsoft Azure
 - Utilized Microsoft Azure for cloud computing
- Hands On Ethical Hacking** | *TeleNetwork Technologies* Jan 2024
- Learned the basics of Ethical Hacking and methods to be cybersafe
 - Hands on experience with Kali Linux and Tools
 - Performed a live attack on dummy
- 1-Day AI Tools Workshop** | *be10x* Dec 2023
- Discovered hidden AI tools and optimized their utilization for maximum benefits
 - Acquired practical skills in implementing tailored AI solutions, enhancing organizational efficiency
 - Explored advanced techniques for leveraging AI resources to solve complex problems effectively
